Contact **The Really Safe Flooring Company.**

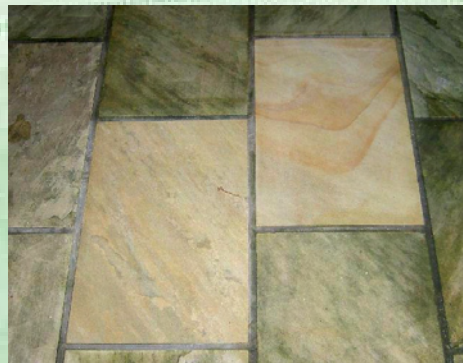

We offer a revolutionary range of cleaning products and techniques, that can tackle many annoying problems that everyday cleaners cannot eradicate such as, algae, limescale, grout, rust, body fats and much more. Add to this our years of experience in Anti-Slip treatments to existing floors. We can now offer to make floors *really* clean and *really* safe.

Furthermore with our excellent *Dry-Treat* Sealant range that does not affect the co-efficient of Friction - your floors will actually become easier to maintain.

These examples are from prestigious Leisure centres around the country that cleaning contractors have struggled to maintain, resulting in the build up of the various problems shown. Our experienced contracting teams can dramatically improve the appearance and safety of your floor and offer a professional service working day and night to help our clients wherever possible. Remember, *Don't slip up on Safety.*

SEALING

Dry Treat Products provide an impregnating, invisible and breathable barrier, which protects porous tiles, natural stone, pavers and grout from damage caused by water, water-borne salts, graffiti and oil based stains.

We are one of the only accredited applicators in the country; which enables our expert flooring team to apply any of the products.

Below is a list of Dry Treat products that we offer.

Stain Proof:

Stain Proof is ideal for terracotta tiles, cast stone, pavers, sandstone, brick, concrete, marble, granite, limestone and grout.

It also greatly reduces:

- Moss and mould growth
- Salt efflorescence
- Freeze thaw spalling
- Oil and food staining
- Cleaning time
- Weathering and wearing

Marble and Porcelain Sealer:

Protects marble, porcelain and low absorbent dense stone from damage caused by water, water-borne salts, graffiti and oil based stains.

Enhancer-Plus Sealer:

Enhancer-Plus Sealer provides enrichment of colour and stain protection.

Water-Repella:

Water-Repella is for outdoor use and provides protection against water and salt damage for:

- Medium to very porous concrete
- Terracotta tile
- Cast stone
- Pavers
- Sandstone
- Limestone
- Brick
- Render
- Grout

Colour Treat:

Colour treat provides permanent colouring and protection for porous building materials. This unique treatment alters the colour of surfaces without creating a "painted" appearance. It can be applied to a wide variety of surfaces and is ideal for disguising colour variations. It can also be applied to grout.
